

**STAR
WARS**[™]

LEGION[™]

SPECIAL OPERATIONS

VERSION 1.1

Effective 7.19.2024

LEGION SPECIAL OPERATIONS

Star Wars™: Legion Special Operations is a game mode for *Star Wars: Legion* that focuses on small squad-level skirmishes. The game utilizes miniatures and core rules from *Star Wars: Legion* but introduces new gameplay mechanics, Squads, and missions.

GAMEPLAY

Star Wars: Legion Special Operations uses prebuilt Squads with customizable Loadouts and is played over four game rounds using the rules for *Star Wars: Legion* (which can be found at AtomicMassGames.com/swlegion/) with a few exceptions, found below. Each player is attempting to complete narrative missions while clashing with their opponent over various objectives.

Star Wars: Legion Special Operations does not use *Star Wars: Legion* unit, command, or upgrade cards. It uses unique versions of these cards that are for *Star Wars: Legion Special Operations*.

GAME MECHANICS

Star Wars: Legion Special Operations uses the majority of the core rules of *Star Wars: Legion*. The exceptions are found below:

SETUP

The process of getting ready to play a game of *Star Wars: Legion Special Operations* is modified from the steps found in the Core Rulebook. *Star Wars: Legion Special Operations* uses the following steps:

1. Establish the Battlefield and Gather Components
2. Declare Terrain
3. Place Terrain
4. Select Player Color and Sides
5. Place Objective Tokens
6. Deploy Units

SQUAD CONSTRUCTION

Players do not select units to make up their armies like a standard game of *Star Wars: Legion*—instead they pick a predetermined Squad to use during the game. These Squads are found at the end of this document. Each Squad also lists available Loadouts, but these are not chosen before players reach the table. Loadouts are selected for your Squad after the mission has been determined but before any units are deployed.

THE BATTLEFIELD

Star Wars: Legion Special Operations is played on a 36" x 36" battlefield.

BUILDING A COMMAND HAND

Players do not build a command hand in *Star Wars: Legion Special Operations*. Instead, a player's command hand consists of three faction-specific Command Cards, two Squad-specific Command Cards, and Standing Orders. All the faction and Squad Command Cards for *Star Wars: Legion: Special Operations* can be found at the end of this document.

SELECTING PLAYER COLOR

Each player rolls 3 red attack dice. The player who rolled the most Critical (⚡) results is the red player. If there is a tie, the player who rolled the most Attack Surge (⚡) results is the red player. If there is still a tie, the player who rolled the most Hit (★) results is the red player. If there is still a tie, the players reroll until the red player is determined.

MISSIONS

Star Wars: Legion Special Operations does not use Battle Decks. Instead, after determining player color, players can select a mission they agree upon or may randomly choose a mission to play.

DEPLOYING UNITS

Starting with the blue player, players alternate, placing one unit from their army within their respective deployment zones as shown on the chosen mission's map. Players continue taking turns placing units until all units have been deployed.

During deployment, a unit may not be placed in base contact with an enemy unit, nor may it move into base contact with an enemy unit.

After deployment is complete, one player takes the round counter and sets it to "1." The game of *Star Wars: Legion Special Operations* is ready to begin!

WINNING THE GAME

Each mission is unique and gives its own victory conditions.

MEASURING AND RANGE

Star Wars: Legion Special Operations uses the standard movement tools for unit movement but does not use the range tools. Instead, use a measuring tape to measure the distances listed for weapons and special rules. When measuring the range for rules with standard *Star Wars: Legion* ranges, each numbered range increment is equal to 6 inches (6").

OBJECTIVE TOKENS

Units in *Star Wars: Legion Special Operations* frequently capture objective tokens to score victory tokens and win the mission. Some objective tokens can be interacted with, usually through card actions listed in that mission's rules.

All objective tokens are placed with their unclaimed side faceup unless otherwise specified. When placing objective tokens on the battlefield during Setup, an objective token cannot be placed overlapping another objective token or only partially overlapping a piece of terrain. If an objective token would be placed partially overlapping terrain, players should adjust terrain placement in a mutually agreeable manner so that the token is no longer partially overlapping terrain. If a mission states that an objective is placed in base contact with a unit during Setup, that objective token is claimed by that unit.

A unit may not be in base contact with an unclaimed objective token at the end of Setup.

Some missions allow units to claim objective tokens through various special rules. A trooper unit must be in base contact with an unclaimed objective token in order to claim that objective token. When a unit claims an objective token, flip the objective token to its claimed side and place it back on the battlefield in the same position.

The token will remain in base contact with the unit as it moves around the battlefield. After the unit performs any movement, that unit's controlling player may pick up any claimed objective tokens and place them in base contact with the unit.

When a unit is defeated, before removing the unit, or when it panics, flip any claimed objective tokens to their unclaimed side, then place them back on the battlefield in the same position. These tokens may be claimed again as normal.

COMMAND CARDS, ORDERS, AND THE COMMAND PHASE

When selecting and playing Command Cards players do not nominate a commander. Instead, Command Cards issue orders to any eligible unit on the battlefield.

LOADOUTS

Each Squad has three double-sided Loadout cards. Loadout cards are unique to each Squad. Before deploying any units, each player secretly selects which side (A or B) they will use for each of their Loadout cards. Players reveal their chosen Loadouts simultaneously and apply the rules on each chosen Loadout card.

ACTIONS

Units in *Star Wars: Legion Special Operations* cannot perform the same action twice—including the move action. *Star Wars: Legion Special Operations* adds a new action: Dash. When a unit makes a dash action, it may make a speed-1 move but may not climb.

COURAGE

Units may not use the courage value of  units in place of their own.

RALLYING

At the start of a unit's activation, it rallies as normal.

BACKUP

Units cannot benefit from backup.

SUPPRESSION

Unlike standard games of *Star Wars: Legion*, a unit with suppression tokens equal to its courage value after rallying does not lose any actions. Instead, when a suppressed unit attacks, before rolling dice, remove one red attack die from the roll. If the attack does not contain any red attack dice, remove a black attack die. If it does not contain any black attack dice, remove a white attack die.

Additionally, units do not remove suppression tokens during the End Phase.

Droid Troopers cannot be suppressed! However, they still gain suppression tokens and can panic.

PANIC

Panic plays a very different role in *Star Wars: Legion Special Operations*. Instead of using the normal Panic rules, any time a unit gains suppression tokens that would cause it to have more suppression tokens than its courage value, the unit Panics. When a unit Panics, roll a black attack die for each suppression token it has exceeding its courage stat. For each Critical (☠) and/or Hit (★) result the unit suffers 1 wound. Then remove suppression tokens from the unit until it has suppression tokens equal to its courage stat.

TERRAIN

Remove the Difficult Terrain type from the game. Terrain is either open or impassable.

COVER

Instead of canceling results, during the Roll Defense Dice step, a unit that has light cover may change 1 of its Defense Surge (⚡) results to a Block (♥) result and a unit with heavy cover may change 2 of its Defense Surge (⚡) results to a Block (♥) result.

SPECIAL RULES

Each unit card has the full special rules for each of its keywords listed on the cards itself (there is no need to reference the *Star Wars: Legion Core Rulebook*) and some of these keywords have had updates or changes to their functionality for *Star Wars: Legion Special Operations*, all of which can be found on the unit cards. Weapon Keywords are not listed on the unit cards. Instead, they can be found below:

CRITICAL X

When attacking, change up to X Surge (⚡) results in the attack pool to Critical (☠) results.

IMPACT X

When attacking a unit with the Armor or Armor X keyword, change up to X Hit (★) results to Critical (☠) results.

FIXED X

To add a weapon that has the Fixed: X keyword to an attack pool, the defending unit must be partially inside the specified firing arc of the attacking miniature.

PIERCE X

When attacking, cancel up to X of the defender's Block (♥) results.

SUPPRESSIVE X

After the attack is resolved, the defending unit gains X suppression tokens.

VERSATILE

Some ranged weapons have the Versatile keyword. Units can perform ranged attacks using a weapon with the Versatile keyword even while engaged. A weapon with the Versatile can be used to perform either a ranged attack or a melee attack.

COVERT DEPLOY

Some Loadouts allow certain units in a Squad to Covert Deploy. Units with the Covert Deploy rule are not deployed normally. When a unit that Covert Deploys would normally be deployed, their controlling player places an order token with the corresponding rank face down instead of deploying a unit. This unit cannot be issued orders until its miniature is on the battlefield. During any End Step of the game, a player who controls a unit with Covert Deploy may reveal its order token and deploy a unit of the corresponding Rank at 10" of the revealed order token. Then remove the order token from the battlefield.

BRING DOWN THE SHIELDS (MISSION)

The attacking squad must infiltrate the defender's base and shut down the shield generator allowing the full assault to begin. Without the success of this operation, the battle is lost!

SETUP

Place 3 Consoles with the claimed sides faceup and 1 Transmitter with the unclaimed side faceup as shown.

The blue player is the defender and deploys their ▲, ▲, and ☛ units in the shown deployment zone. Their remaining units deploy during the game. The red player is the attacker and deploys their entire force in the shown deployment zone.

WINNING THE GAME

- If the attacker has 3 or more VPs at any time, they win the game immediately.
- At the end of the 4th round the defender wins the game.

SCENARIO RULES

ATTACKER:

All of the Attacker's units gain the following actions:

CONSOLE ACTION (▶): Roll 3 black attack dice. If the unit making this action is a ☛ unit, you may reroll one of the dice. If any of the results rolled match an uncovered slot on the Transmitter card, you may put an advantage token on that slot.

TRANSMITTER ACTION (▶): If the Transmitter card has 6 or more slots filled, remove all advantage tokens from the Transmitter card. The Attacker then scores 1 VP.

DEFENDER:

All of the Defender's units gain the following action:

CONSOLE ACTION (▶): Choose one of the following effects:

CALL FOR BACKUP: Add a black attack die to the reinforcements pool.

SUPPRESSION WEBS: Choose an enemy unit and roll 3 black attack dice. The chosen unit gains 1 suppression token for each Critical (☛) or Hit (☛) result rolled.

ENCRYPT: Roll 1 black attack die. If the unit making this action is a ☛ unit, you may roll one additional die. If any of the results rolled match a covered slot on the Transmitter card, you may remove an advantage token from that slot.

REINFORCEMENTS

At the start of each End Step, roll all dice in the Reinforcements pool, if any. Deploy one unit not deployed at the start of the game in your deployment zone, then for each Critical (☛) and Surge (☛) result rolled deploy an additional unit, or remove one suppression token from a friendly unit. At the start of the 4th round, if there are still units that have not been deployed, deploy those units in your territory.

TRANSMIT THE CODES! (MISSION)

A Crack Squad has stolen the codes to the vault and is attempting to get them back to command. They must make it to a transmitter with the codes—but they have set up clever decoys! The defending team must find the correct codes and prevent their transmission.

SETUP

Place 3 Transmitters with the claimed side faceup as shown. The red player is the Crack Squad. The blue player is the defender. When deploying, after they deploy their first unit, the defender must alternate deploying the rest of their units between their two deployment zones, starting with either zone.

WINNING THE GAME

- If the unit leader with the Codes is in base contact with any Transmitter with the claimed side faceup at the start of the End Phase, it may reveal the Codes token. The Crack Squad wins the game.
- At the end of the 4th round the defender wins the game.

SCENARIO RULES

GENERAL:

UNDER PRESSURE: Units that panic do not drop advantage tokens. When a unit holding an advantage token panics, the defender may look at the hidden side of that advantage token.

☛ UNITS: When a ☛ unit in the Crack Squad with an advantage token makes a dash action, it may make a speed-2 move instead. While a ☛ unit in the defending squad is in base contact with a transmitter, flip that transmitter to the unclaimed side.

CRACK SQUAD:

THE CODES: After deploying, assign 3 unit leaders the 1, 2, and 3 advantage tokens. Keep these advantage tokens face down so that no pips are showing. These are treated as claimed objective tokens. A player may look at any of their units' advantage tokens at any time. The 1 token is the Codes, 2 and 3 are Decoys. When a unit drops an advantage token, do not flip it over. If a unit would drop an advantage token, before it is removed, another friendly unit at 3" may claim that advantage token. A unit may never have more than one advantage token at a time.

SECURE THE PACKAGE (▶): Claim an advantage token as if it was an unclaimed objective token.

OBJECTIVE ACTION (▶): A unit leader with an advantage token may choose one or more other unit leaders at 3" of itself. Remove all advantage tokens from this unit and each chosen unit. You must then assign one of those advantage tokens to each unit leader.

FOCUS ON THE MISSION: Units in the Crack Squad gain **DISENGAGE** (*This unit may make move actions while it is engaged with enemy units*).

DEFENDING SQUAD:

STOP RIGHT THERE! Units in this Squad gain the following action:

HALT! (▶): Choose an enemy unit at 3" with an advantage token. You may look at the advantage token.

DISABLED VEHICLE (MISSION)

An enemy vehicle has triggered an ambush and must defend itself until air support can arrive. The ambushing squad must destroy the tank before the air support arrives and obliterates the ambushers.

DEPLOYMENT

The blue player is the defender. Place the Immobilized Vehicle for the corresponding faction in the center of the battlefield on the unclaimed objective token. Place 4 Ambush Networks on the battlefield claimed side faceup. The defender deploys all their units in base contact with their Immobilized Vehicle. The red player is the ambusher. When deploying units, the red player may choose to deploy them in their deployment zone or begin the game in the Ambush Network.

WINNING THE GAME

- If the Immobilized Vehicle is destroyed the ambushing player wins the game.
- At the end of the 4th round the defender wins the game.

SCENARIO RULES

AMBUSH NETWORK: A unit in the Ambush Network is not on the battlefield and may never be measured to or from. A unit in the Ambush Network may be issued orders. At the start of a unit's activation, if it is in the Ambush Network it is placed in base contact with an Ambush point and it gains one Detonator token. A unit that is placed in this way cannot make a move action during its activation but may dash.

DETONATOR TOKENS: Set aside advantage tokens to use as Detonator tokens.

AMBUSHING SQUAD

AMBUSH POINT (↗): Remove this unit from the battlefield and place it in the Ambush Network. A unit may not perform this action during the same activation that it enters the battlefield.

DETONATOR (↗): A unit may only use this action if it has a Detonator token. A unit may not have more than one Detonator token at any time. A unit may throw its Detonator at the Immobilized Vehicle if it is in LOS. Measure the distance from the unit to the Immobilized Vehicle. The unit rolls 10 white attack dice, removing one die from the roll for each full inch the unit leader is away from the Immobilized Vehicle. The Immobilized Vehicle suffers one damage for each Critical (☠), Hit (★), and Surge (🌀) result in the roll. Then remove the Detonator token from this unit. A unit cannot make a Detonator action if it has already made an attack action this activation and cannot make an attack action if it has already made a Detonator action this activation.

☠ **UNITS:** While a friendly unit is at 3" of another friendly ☠ unit, it gains the following action:

REARM: (↗): This unit gains 1 Detonator token.

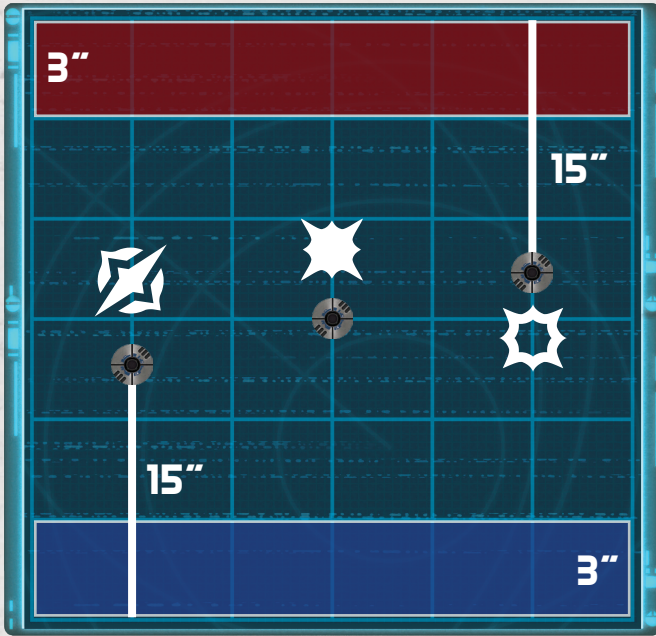

DEFENDING SQUAD

DEFENSIVE POSITION: Units in base contact with the Immobilized Vehicle have heavy cover.

☠ **UNITS:** While in base contact with the Immobilized Vehicle, ☠ units in the defending squad gain the following action:

REPAIR VEHICLE: (↗): Remove 1 wound from the Immobilized Vehicle.

SHIFTING PRIORITIES (MISSION)

SPECIAL RULES

Place 3 objective tokens unclaimed side up on the battlefield as shown. At the start of the second Command Phase and each subsequent Command Phase, the blue player rolls a black attack die. If the result is a Critical (☠), the right-most objective is the priority objective this round. If the result is a Surge (🌀), the left-most objective is the priority objective this round. If the result is a Hit (☘), the center objective is the priority objective this round. If the result is a blank, there is no priority objective this round.

During the End Phase of each round, each player scores 1 VP for each objective token they control and one additional VP if they control the priority objective. The player with the most unit leaders at 3" of an objective controls that objective token. When determining which player controls an objective token, count each 🗡 unit as two units.

WINNING THE GAME

A player immediately wins when they score 7 or more VPs. If both players score 7 or more VPs simultaneously, the player with more VPs wins. If they are tied, neither player wins. Instead, the game continues until one player has scored more VPs than their opponent, at which point they immediately win.

If neither player has won by the end of the 4th round, the player with the most VPs is the winner. If both players are tied at this point, the game continues for one more final round. If at the end of this round the players are still tied, the game ends in a tie.

CONDITION CHART

After the mission is decided, players may choose to use an optional Condition effect. If they do, roll a white attack die and a red defense die. The effect corresponding to the result of the white die is applied to two rounds of the game. If the red defense die is a Block (♥), the effect applies to the first two rounds of the game. If the red defense die is a blank or Surge (🌀), the effect applies to the last two rounds of the game.

ROLL RESULT (WHITE DIE)	WEATHER TYPE	EFFECT
	INCLEMENT WEATHER	When attacking, increase the target unit's cover by 1 unless the attacking unit has made an aim action this activation.
	COVER OF DARKNESS	Reduce the range of ranged weapons by 4" to a minimum of 6".
	COMMS DISRUPTION	During the Command Phase players issue 1 less order. After assigning orders, draw an order from the order pool and assign it to a corresponding unit.
BLANK	CLEAR	No effects.

LEGION SPECIAL OPERATIONS SQUAD INFO

REBEL ALLIANCE

REBEL TROOPERS SQUAD

- Rebel Trooper Captain
- 4x Rebel Troopers
- Rebel Trooper, DLT-20A
- 2x Rebel Pathfinders

FLEXIBLE TRAINING**LOADOUT 1A**

When a unit in this Squad performs a dodge or aim action, it gains 1 surge token.

REBEL COMMANDOS

© LFL © AMG

VIGILANT**LOADOUT 1B**

During the End Phase, choose up to 3 friendly trooper units. They do not remove 1 dodge token during the Remove Tokens step.

REBEL COMMANDOS

© LFL © AMG

AGILITY TRAINING**LOADOUT 2A**

Units in this Squad can spend dodge tokens to cancel \mathcal{A} results.

REBEL COMMANDOS

© LFL © AMG

IMPROVED COMMS**LOADOUT 2B**

Units in this Squad ignore the effects of the Comms Disruption condition.

REBEL COMMANDOS

© LFL © AMG

EXTRA MUSCLE**LOADOUT 3A**

Replace the Wookiee Warrior, Bowcaster in your Squad with a Wookiee Warrior, Ryyk Blades.

REBEL COMMANDOS

© LFL © AMG

WITHERING FIRE**LOADOUT 3B**

When a friendly \mathcal{A} unit performs a ranged attack, if the defending unit does not have a facedown order token, the attack pool gains **SUPPRESSIVE 1**. (After this attack is resolved, the defending unit gains 1 suppression token.)

REBEL COMMANDOS

© LFL © AMG

AGILITY TRAINING**LOADOUT 1A**

Units in this Squad can spend dodge tokens to cancel \mathcal{A} results.

REBEL TROOPERS

© LFL © AMG

CALM AND COLLECTED**LOADOUT 1B**

Units in this Squad can spend dodge tokens as if they were aim tokens.

REBEL TROOPERS

© LFL © AMG

FIRE ON MY TARGET!**LOADOUT 2A**

When a friendly Rebel Trooper, Captain or a Rebel Pathfinder performs an attack action, after the attack is resolved, the defender gains 2 observation tokens.

REBEL TROOPERS

© LFL © AMG

KEEP THEM BACK**LOADOUT 2B**

Units in this Squad at 3" of an objective token gain **PRECISE 1**. (When you spend an aim token to reroll attack dice, you may reroll one additional die.)

REBEL TROOPERS

© LFL © AMG

DUG IN**LOADOUT 3A**

At the start of the first Activation Phase, each unit in this Squad gains 1 dodge token.

REBEL TROOPERS

© LFL © AMG

DESPERATION**LOADOUT 3B**

At the start of the last round, each unit in this Squad recovers.

REBEL TROOPERS

© LFL © AMG

SILENT APPROACH

REBEL COMMANDOS

3 UNITS

Each unit in this Squad may choose up to 1 enemy miniature in LOS. Each chosen enemy miniature gains 1 observation token.

SET CHARGES

REBEL COMMANDOS

1 UNIT

During a friendly Rebel Commando, Saboteur's activation, it gains the following weapon:

6    

CRITICAL 3, IMPACT 3

HOLD AT ANY COST

REBEL TROOPERS

3 UNITS

When a unit in this Squad is declared as the defender of an enemy attack, it may gain 1 suppression token. If it does, it gains 1 dodge token.

DEFIANT DEFENSE

REBEL TROOPERS

3 UNITS

When a unit in this Squad Panics, it only suffers a wound if it rolls a  result. Additionally, if it rolls a  result, it removes 1 wound.

HERO OF THE REBELLION

1  UNIT OR 1  UNIT

When a unit is issued an order from this card, it recovers. Then, it gains 1 aim token and 1 dodge token.

BUILT ON HOPE

1  UNIT & 2  UNITS

Each time a friendly unit Panics, it removes 1 suppression token.

FEEL LIKE A HUNDRED

3 UNITS

When performing a ranged attack, friendly units' attack pools gain **SUPPRESSIVE 1**. (After this attack is resolved, the defending unit gains 1 suppression token)

STANDING ORDERS

1 UNIT

At the end of the Command Phase, return this card to your hand.
