

JOHAN BENVENUTO

MATHIEU RIVERO

HARMONIES CRESCENDO

GAME RULES

FROM THE GAME DESIGNER AND HIS SPECIAL GUEST CO-DESIGNER:

Johan Benvenuto: *Once again—and yes, once more, because they truly deserve it—I want to thank the entire Libellud team for their hard work and kindness. A special thanks to Mathieu, my co-designer, for his fresh ideas; and to the talented Maëva, without whom this game likely wouldn't be in your hands today. I also want to thank all of you who made this adventure possible; your enthusiasm was crucial in bringing this expansion to life.*

Mathieu Rivero: *I'm sure you'd rather play than read lengthy acknowledgments, so I'll keep it brief. Thank you to Johan and the Libellud team for the invitation to collaborate with Johan, the warm and passionate conversations, and especially for the human touch that makes Harmonies the game it is. (Apologies, everyone—the secret's out!)*

2026 CREDITS – Designers: Johan Benvenuto & Mathieu Rivero • Artwork: Maëva Da Silva • Project Manager: Camille Jaulin • Development: Matthis Gaciars • Art Director: Maëva Da Silva • Layout and functional design: Thomas Dutertre & Joeva Gaubin • Graphic Design: Simon Hay • Additional Writing: Jérôme Vessièrre • Translation: Angelina Petrovic • Editing: Scott Lewis • Marketing Manager: Anne-Sophie Martin • Collection Manager: Mathieu Aubert

The team is grateful to Rosie, Marion, Lucas, Maximilien, Stéphane, Clément, Léa, and all the others who contributed to the development of this expansion.

INTRODUCTION

This expansion features three new modules to enhance your gameplay experience! Just like with the “Nature’s Spirits” module, the Side B of the base game Personal boards, and the module in the *Pulse* expansion, these modules can be played on their own or combined in a variety of ways. Simply choose which modules you wish to use before setting up the game!

Enjoy mixing this expansion’s modules with each other, and with previous modules, based on your preferences and desired level of complexity. Here are some suggested configurations to help you explore the expansion progressively:

“Sanctuaries” module using Side A
(without Nature’s Spirits)

“Whispers” module using Side D
(without Nature’s Spirits)

“Whispers” and “Sanctuaries” modules,
using Side C (without Nature’s Spirits)

“Whispers”, “Sanctuaries”, and
“Nature’s Spirit” modules, using Side B

CONTENTS

SANCTUARIES

Page 4

Adds complexity and strategic depth

Create spectacular new landscapes
which can accommodate multiple animals.

Specializing which cards you take
will allow you to place more Animal cubes.

10 double-sided Sanctuary tiles

In-Progress side

Completed side

NEW PERSONAL BOARDS

Page 8

Discover two easy sources of renewal

Experiment with irrigation systems and environmental diversity to uncover new ways to shape your landscapes and score points.

4 double-sided Personal boards

4 Reminder cards

- 1 Rulebook
- 1 Scoresheet pad

WHISPERS

Page 10

Adds a strategic layer to the game with minimal complexity

Whispers are the discreet witnesses to the lifecycles of nature itself. Add new cards to the Animal deck and work to create synergies between Animals and Whispers.

10 Whisper cards

20 Whisper cubes

SANCTUARIES

These spectacular landscapes can accommodate multiple animals as well as enhance the environment.

Sanctuaries are built by creating unique stacks of tokens that would normally not be allowed. Each Completed Sanctuary provides you with opportunities associated with its 2 token colors, both during the game and when scoring points at the end of the game.

Setup

Shuffle the Sanctuary tiles and place them to create a draw pile in the center of the table, with the In-Progress side facing up **1**.

Then, draw 2 Sanctuary tiles and place them next to the draw pile so that 3 tiles are visible to the players **2**.

Game Turn

When using this module, a new optional action is available: during your turn, in addition to your other actions, you may take 1 Sanctuary tile from the 3 available and place it above your Personal board **1**.

Sanctuary tiles are treated just like cards; you can never have more than 4 cards and/or tiles above your Personal board.

At the end of your turn, if you took one of the 2 tiles next to the draw pile, replace it with the top tile from the draw pile (if possible). This will ensure that 3 tiles are always visible to the players, until there are 2 or fewer tiles remaining **2**.

While you have a Sanctuary tile above your Personal board, you can create a single specific terrain stack that would not typically be allowed.

EXAMPLE:

1

Mathieu previously took the Sanctuary tile shown here **1**.

If he takes a blue token, he can place it on a mountain of height 2 **2**. He could not have done this before taking the Sanctuary tile, because placing water on top of a mountain is normally not allowed. Once that token is placed, Mathieu would **not** be allowed to place another blue token on a different mountain of height 2 **3**. However, he can complete this Sanctuary by following the specified pattern **4**, placing a second blue token on top of the previous stack.

2

3

4

As soon as a Sanctuary is completed, flip the tile so its Completed side is face up, then place it next to your Personal board, so that it's visible to all players. Each Sanctuary is associated with 2 token colors and provides 2 advantages related to those colors: one **during the game** and the other **during end-game scoring**.

During the game, the final cube from certain Animal cards can be placed onto a Completed Sanctuary. When exactly one cube remains on an Animal card, and if its color matches either of the Sanctuary's two colors, you can take that cube and place it onto the Sanctuary (thus completing the Animal card). During the game, each Sanctuary can hold any number of cubes placed in this way.

If placing the cube on the Sanctuary stack itself would be too crowded, you may choose to place the cubes onto the Sanctuary tile; treat these cubes as if they were on the stack.

EXAMPLE:

*After placing the second cube from this gray Animal card onto a gray token **1**, only 1 cube remains on the card. Johan can immediately place that cube on top of his blue and gray Sanctuary **2**, even if other cubes have been placed there previously.*

Tallying points

During scoring, each Completed Sanctuary earns you 3 points for each adjacent token matching either of the Sanctuary's two colors.

NOTE: You only look at the **top token** of each adjacent space.

EXAMPLE:

For the Sanctuary shown in this example the player would score 12 points; 3 for each adjacent space for which the top token is either blue or gray.

ADDITIONAL RULES

- During scoring, Sanctuaries do not count as specific elements of a landscape (they are neither part of a River, Mountain, nor Field). For instance, the landscape depicted here does **not** represent a River of length 3.

- When tallying points for Buildings or for Sanctuaries, adjacent Sanctuaries are treated the same as other landscapes: only consider the **top** token of a Sanctuary, regardless of whether it is Completed or not.
- Sanctuaries can only hold Animal cubes; Nature's Spirit and Whisper cubes (see "Whispers") may never be placed onto a Sanctuary.
- You may take (and complete) multiple Sanctuary tiles throughout the game. There is no penalty for leaving a Sanctuary unfinished at the end of the game.

NEW PERSONAL BOARD

Each side of the new Personal board features a unique layout and ruleset that encourages you to shape your landscapes in fresh and creative ways.

Setup

Before setting up the game, the players may collectively decide to play with either side C or D of the new Personal board. As usual, all players must play with the same side faceup. Each player takes the new Reminder card, displaying the side that matches the chosen Personal board.

Side C

On this side, there is no space at the center of the Personal board. Therefore, you cannot place any tokens there.

Buildings can earn you more points using this side, but to do so they must be surrounded by at least 4 tokens of different colors (instead of the usual 3).

BUILDINGS - SIDE C:

You score 8 points for each Building, but only if surrounded by at least 4 tokens of different colors (out of the 6 available, including red). As usual, only consider the top token on each adjacent space. If this criterion is not met, a Building is worth 0 points.

EXAMPLE:

All other landscapes follow the same rules as when using Side A.

Side D

On this side, some spaces are dry at the beginning of the game . The other spaces are ordinary spaces.

A dry space becomes ordinary when it is adjacent to Water.

Fields and Trees earn you more points with this side, provided that they occupy ordinary spaces. However, you won't earn any points if the spaces they occupy are dry at **the end of the game**.

TREES - SIDE D:

The height of each Tree determines the number of points you score on an ordinary space.

FIELDS - SIDE D:

You score 6 points for each Field formed by 2 or more contiguous yellow tokens, provided that at least one of them occupies an ordinary space.

EXAMPLE:

All other landscapes follow the same rules as when using Side A.

WHISPERS

Discreet inhabitants of nature, the Whispers enrich any environment which they inhabit.

Place them in your landscapes to score points;
have them coexist with your animals to score even more points.

Setup

Add the 10 Whisper cards to the Animal deck before shuffling it. Place the top 5 cards faceup next to the deck, as usual. Place the Whisper cubes next to the Animal cubes.

Game Turn

Whisper cards have some similarities with Animal cards:

- On your turn, if a Whisper card is available in the center of the table, you may choose to take it **instead of an Animal card**, placing that card above your Personal board **1** (provided you have fewer than 4 cards and/or tiles).
- When you take a Whisper card, place 1 Whisper cube from the reserve on each of its 2 spaces **2**;
- After you have created the habitat pattern shown on the card on your Personal board, you may place 1 Whisper cube on the corresponding token within the habitat on your Personal board **3**.
This action is optional, and you may perform it multiple times, at any point during your turn. The token on which the cube would be placed must be free of any **Whisper** cubes.
- Once both of a Whisper card's cubes have been placed, put that card next to your Personal board **4**. It is considered complete and no longer counts against your 4-card/tile limit above your Personal board.

However, there is a major **difference**:

A Whisper cube and an Animal (or Nature's Spirit) cube may occupy the same space (regardless of the order in which they are placed). In fact, it is recommended that you do so to earn more points!

Tallying points

Whisper cubes score points for being placed on your Personal board as follows:

Score 2 points for each space containing a lone Whisper cube (without an Animal or Nature's Spirit cube).

Score 5 points for each space containing both a Whisper cube and an Animal (or Nature's Spirit) cube.

There is no penalty for not removing all cubes from a Whisper card, other than it being worth fewer points.

EXAMPLE:
